

The Application of Power Seating Functions: Beyond the Basics

Jay Doherty, OTR, ATP/SMS

.4 CEU's (4 hours)

Course Description:

This course will examine the coverage criteria, clinical benefits and research in support of the various power seating functions, provide the clinician with practical tools to consider and incorporate when evaluating and documenting the need for power seat options; and assist the supplier in reading and interpreting the information in the medical record to determine when to provide power tilt, power recline, a combination of tilt and recline; when power ELRs or a power AFP is medically necessary and what is required for power seat elevation to be considered a covered benefit. The course will include case studies and a hands on component for participants to assess the various power seat functions.

Course Learning Objectives:

At the conclusion of the course the participant will be able to:

- 1) Name at least 4 considerations involved in the selection of seating and power positioning options.
- 2) State at least 2 the clinical benefits of tilt and recline related to Pressure Management.
- 3) List 2 potential contraindications for using power recline and 1 potential contraindication for using power tilt.
- 4) State 1 clinical benefit for use of power adjustable seat height in participating or performing MRADLs
- 5) Discuss and utilize evidenced based research and apply to clinical decisions in the selection of power positioning systems

Course Content:

- Literature review and research in support of the application of power tilt/recline, power leg elevation
- Literature review and research in support of the application of power adjustable seat height
- Hands on trial/simulation with power seating functions and their application across the various indications and contraindications
- Case study application and recommendation of power seat functions, discussion as to why they were selected and why other options were not recommended.
- Class requirements include Demonstrations in the Exhibit Hall. Documented participation at the Exhibitors' booths is a requirement to fulfill CEU class completion.

TARGET AUDIENCE:

Licensed/Certified Medical Professional (i.e. PT, OT, Physician, Nurse, etc.)

***Rehab Professional (i.e. ATP, CRTS, Seating specialist, etc.)
Reimbursement & Billing Specialists***
